

Turn off the A/C and use the ceiling fans.

Have the A/C checked and remember to change the filters monthly.

Check the weatherstripping around the house.

Clean the refrigerator coils.

Turn down the water heater to 120 degrees.

SPRING TIME ENERGY TIPS

Use natural lighting as much as possible.

Dust or wipe down light bulbs because clean bulbs provide more light.

Replace old incandescent light bulbs with energy efficient CFLs or LEDs.

If you are replacing old appliances, always look for ENERGY STAR because they are more efficient and will help reduce your energy costs. Rebates are sometimes available through FPUA.
