The City Commission
and Retirement Board
City of Fort Pierce Retirement and Benefit System
Fort Pierce, Florida

Dear City Commission and Retirement Board:

The results of the September 30, 2016 annual actuarial valuation of the City of Fort Pierce Retirement and Benefit System are presented in this report. The purpose of the valuation was to measure the System's funding progress and to determine the employer contribution rates for the 2017-2018 fiscal year. The computed contribution rates shown on page B-1 are best viewed as the minimum contribution rates that comply with the Board's funding policy. Users of this report should be aware that contributions made at that rate do not guarantee benefit security. Until the plan is fully funded, we encourage the plan sponsor to contribute in excess of the computed contribution rate.

We believe that the ideal circumstance is for a plan to be fully funded at relatively low levels of risk. Therefore, we encourage a review of investment and other sources of risk as the plan approaches full funding.

Disclosures under the Governmental Accounting Board (GASB) Statements No. 67 and No. 68 were issued in a separate report.

This report may be distributed to parties other than the System only in its entirety and only with the permission of the Board. This report should not be relied on for any purpose other than those described above. It was prepared at the request of the Board and is intended for use by the Retirement and Benefit System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The signing actuaries are independent of the plan sponsor.

The valuation was based upon information, furnished by the City, concerning Retirement System benefits, financial transactions, and individual members, terminated members, retirees and beneficiaries. Data was checked for internal and year-to-year consistency, but was not audited by us. As a result, we are unable to assume responsibility for the accuracy or completeness of the data provided.

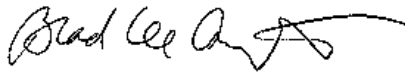

Future actuarial measurements may differ significantly from those presented in this report due to such factors as experience differing from that anticipated by actuarial assumptions, changes in plan provisions, actuarial assumptions/methods or applicable law. Due to the limited scope of this assignment, we did not perform an analysis of the potential range of future measurements.

This report was prepared using assumptions set by the Retirement Board (except mortality) as described in Section D. By the Retirement Board's acceptance of this report, assumptions first used for the September 30, 2016 actuarial valuation will be deemed adopted.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. We certify that the information contained in this report is accurate and fairly presents the actuarial position of the City of Fort Pierce Retirement and Benefit System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

Brad Lee Armstrong and Jeffrey T. Tebeau are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,

Brad Lee Armstrong, ASA, EA, FCA, MAAA

Jeffrey T. Tebeau, ASA, EA, MAAA

SECTION A

SUMMARY OF VALUATION RESULTS
AND CERTIFICATION

SUMMARY OF VALUATION RESULTS

SEPTEMBER 30, 2016

FUNDING OBJECTIVE

The basic funding objective of the Retirement and Benefit System is to avoid transfer of the cost of benefit obligations between generations of taxpayers. This objective is implemented by contributions sufficient to:

- Pay for costs allocated to the current year on account of service rendered by participants in the current year (Normal Cost).
- Pay for costs allocated to prior years on account of service rendered by participants in prior years (Unfunded Actuarial Accrued Liability) over a maximum 30-year period.

The annual actuarial valuation measures the relationship between Retirement and Benefit System obligations and assets and determines the contribution rates for the ensuing year. Several of the shortest amortization bases were combined in order to moderate scheduled contribution rate changes.

FUNDING PROGRESS INDICATORS

The September 30, 2016 actuarial valuation indicates that the actuarial accrued liabilities of the Retirement and Benefit System are 89% funded by valuation assets. This is a decrease from last year's funded ratio of 93%. Although not historically referred to, the ratio of the market value of assets to the Actuarial Accrued Liabilities is 88% which is lower than last year.

TRENDS TO MONITOR

The funding value of assets currently exceeds the market value of assets by approximately \$2 million. If gains from investment returns above the 7.75% assumed or gains from other sources do not emerge, this will create upward pressure on contribution requirements and a coinciding downward pressure on the funded ratios in subsequent valuation years.

SUMMARY OF VALUATION RESULTS

SEPTEMBER 30, 2016

ASSUMPTION CHANGES

House Bill 1309 of 2015 mandates the use of the Florida Retirement System (FRS) mortality tables for the valuation dates beginning with the September 30, 2016 actuarial valuation. The FRS uses versions of the RP-2000 tables and projection scale BB in a reasonable manner. These mortality tables produce life expectancies that are longer for males and females.

Both forward-looking asset return and inflation expectations have declined significantly in the past few years. The probability of exceeding an 8.0% rate of return is less than 35% in each year based on GRS Capital Market Assumptions Modeler. Therefore, we have lowered the assumed rate of return to 7.75%. If the economic assumption expectations continue to decline, we may have to revisit this as soon as next year.

In recent years, salary increases have been lower than expected. To reflect a muted expectation, the merit and seniority salary increase rates were reduced for General and Utilities Authority and the wage inflation assumption was reduced from 4.5% to 4.0% for all groups. Furthermore, the rates of withdrawal were increased for all groups to reflect higher than expected turnover experience.

The loads on service related retirements were reduced for General members from 4% to 3.5% and for Utilities Authority members from 3.5% to 3% as part of the ongoing recognition of Senate Bill 1128 of 2011.

The total impact of the assumption changes increased the actuarial accrued liability by \$10.1 million and increased the employer contribution requirement by \$0.6 million.

SUMMARY OF VALUATION RESULTS

SEPTEMBER 30, 2016

OBSERVED EXPERIENCE

While the investment return on market value was 9.65%, the recognized rate of investment return was 8.89% due to averaging investment experience over the last 4 years. The recognized investment return was greater than 8.0% assumed return for fiscal year 2016. Note that each year's investment experience gain (loss) is spread over four years in equal dollar installments to reduce the effect of market volatility on contribution rates.

Demographic experience varied among the divisions. The principal deviations from projected experience were:

- 10.1% average pay increases across all the divisions vs. 5.9% expected (unfavorable)
- 10-year average payroll growths were less than the 4.0% assumed (unfavorable for unfunded liability contribution rates)
- Reductions in active member workforce for Police (favorable for normal cost; unfavorable for unfunded liability)

The net effect of the preceding experience factors was an aggregate experience gain of \$1,460,257.

Year-to-year experience variations are expected and normal in the operation of a retirement system as members vary their activities and economic conditions change. The expectation is that the favorable years and unfavorable years will tend to cancel over 5 to 10 year periods.

Derivation of the current year's gain is located on Page B-3.

SUMMARY OF VALUATION RESULTS SEPTEMBER 30, 2016

VALUATION RESULTS - CONTRIBUTION REQUIREMENT

The percent-of-payroll contribution requirements for the 2017-2018 fiscal year are:

	General	Utilities Authority	Police
Members			
-Bargaining	5.16 %	6.16 %	5.16 %
-Non-Bargaining	5.16	6.16	5.16
Employer for			
-Bargaining	17.35 %	17.92 %	11.98 %
-Non-Bargaining	17.35	17.92	11.98
-Illustrative	\$1,639,755	\$2,439,936	\$799,048

For comparison, the percent-of-payroll contribution requirements for the 2016-2017 fiscal year based on last year's valuation are:

	General	Utilities Authority	Police
Members			
-Bargaining	5.16 %	6.16 %	5.16 %
-Non-Bargaining	5.16	6.16	5.16
Employer for			
-Bargaining	14.89 %	16.23 %	14.61 %
-Non-Bargaining	14.89	16.23	14.61
-Illustrative	\$1,200,633	\$2,098,810	\$997,089

Comparative contribution information is shown on page B-2. Composition of the current contribution rates is shown on page B-1.

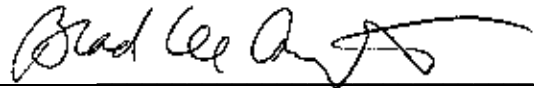

SUMMARY OF VALUATION RESULTS SEPTEMBER 30, 2016

COST-OF-LIVING ADJUSTMENT (COLA)

Section 13 - 43 of the City's Code of Ordinances provides for a COLA if the investment return of the fund exceeds that required to satisfy the actuarial interest assumption, which did happen this year. In addition, the cumulative value of any COLA's granted since 1999 may not exceed the cumulative net actuarial gains since 1999. Page B-11 shows the cumulative value of COLA's and net actuarial gains/(losses) since 1999. The present balance is (\$30,378,996). So even though the recognized rate of investment return for the last fiscal year of 8.89% exceeded the actuarial interest assumption of 8%, no COLA could be provided under Section 13 - 43 until the Retirement and Benefit System's future actuarial gains exceed \$30,378,996 plus interest. Given the cumulative net actuarial loss balance, this COLA provision is not likely to operate for the indefinite future.

CERTIFICATION

This actuarial valuation was prepared and completed by me or under my direct supervision, and I acknowledge responsibility for the results. To the best of my knowledge, the results are complete and accurate, and in my opinion, the techniques and assumptions used are reasonable and meet the requirements and intent of Part VII, Chapter 112, Florida Statutes. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation report. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation report.

Brad Lee Armstrong, ASA, FCA, EA, MAAA
Enrolled Actuary No. 14-5614

OTHER OBSERVATIONS

General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Contributions and Funded Status

Given the System's contribution allocation procedure, if all actuarial assumptions are met (including the assumption of the Retirement and Benefit System earning 7.75% on the Market Value of Assets), it is expected that:

1. The employer normal cost is sufficient to cover the cost of benefits accruing each year;
2. The Unfunded Actuarial Accrued Liabilities (UAAL) will continue to be amortized according to the schedules on pages B7-9, but may not be completely paid off in the definite future; and
3. The funded status of the Retirement and Benefit System will continue to increase gradually towards a 100% funded ratio.

Limitations of Funded Status Measurements

Unless otherwise indicated, a funded status measurement presented in this report is based upon the Actuarial Accrued Liability (AAL) and the Funding Value of Assets (FVA). Unless otherwise indicated, with regard to any funded status measurements presented in this report:

1. The measurement is inappropriate for assessing the sufficiency of Retirement System assets to cover the estimated cost of settling the Retirement and Benefit System's benefit obligations, for example: transferring the liability to an unrelated third party in a market value type transaction.
2. The measurement is dependent upon the Actuarial Cost Method which, in combination with the Retirement System's amortization policy, affects the timing and amounts of future contributions. The amounts of future contributions will most certainly differ from those assumed in this report due to future actual experience differing from assumed experience based upon the actuarial assumptions. A funded status measurement in this report of 100% is not synonymous with no required future contributions. Even though the funded status is over 100%, the Retirement and Benefit System would still require future normal cost contributions (i.e., contributions to cover the cost of active membership accruing an additional year of service credit).
3. The measurement would produce a different result if the Market Value of Assets (MVA) were used instead of the FVA, unless the MVA is used in the measurement.

OTHER OBSERVATIONS

Limitations of Project Scope

Actuarial standards do not require the actuary to evaluate the ability of the plan sponsor or other contributing entities to make required contributions to the plan when due. Such an evaluation was not within the scope of this project and is not within the actuary's domain of expertise. Consequently, the actuary performed no such evaluation.

Risks to Future Employer Contribution Requirements

There are ongoing risks to future employer contribution requirements to which the Retirement and Benefit System is exposed, such as:

- Actual and Assumed Investment Rate of Return
- Actual and Assumed Mortality Rates
- Amortization Policy

SECTION B
VALUATION RESULTS

**CONTRIBUTIONS TO FINANCE BENEFITS OF THE
RETIREMENT AND BENEFIT SYSTEM
FOR THE PLAN YEAR BEGINNING OCTOBER 1, 2017
TO BE CONTRIBUTED DURING THE FISCAL YEAR
BEGINNING OCTOBER 1, 2017**

Contributions for	Contributions Expressed as Percents of Active Member Payroll		
	General Members	Utilities Authority	Police Members
Normal Cost			
Service pensions	11.44 %	10.52 %	12.68 %
Disability pensions	0.46	0.42	0.92

Deferred service pensions	2.26	2.30	1.87
Refunds of member contributions	0.76	0.91	0.55
Total Normal Cost	15.43	14.65	16.39
Unfunded Actuarial Accrued Liability ⁽¹⁾			
Retired members and beneficiaries	0.00	0.00	0.00
Active and vested terminated members	3.98	6.52	0.00
Total Unf'd. Actuarial Accrued Liability	3.98	6.52	0.00
Administrative Expenses	0.79	0.79	0.79
Total Unadjusted Computed Contribution	20.20	21.96	17.18
Adjustments to Computed Contribution			
FS 112.64 (5) Compliance	2.31	2.12	1.13
Full funding credit ⁽²⁾	0.00	0.00	(1.17)
Total Adjustments	2.31	2.12	(0.04)
Total Adjusted Contribution Requirement ⁽³⁾	22.51	24.08	17.14
Member portion	5.16	6.16	5.16
Employer portion	17.35	17.92	11.98

(1) Financing period schedules begin on page B-7.

(2) This is a temporary credit toward the contribution requirement; see page B-9.

(3) FS 112.64 (2) states that "the total contributions to the retirement system or plan shall be sufficient to meet the normal cost of the retirement system or plan and to amortize the unfunded liability." Therefore, the Total Adjusted Contribution for the System shall be no less than Total Normal Cost for the System including the Administrative Expense Load.

FS 112.64 requires employer contributions to be deposited not less frequently than quarterly. Member contributions, which are in addition to the Employer contributions, must be deposited immediately after each pay period.

15/16	9/14	15.03	16.30	13.76	4,196,009	4,211,311
16/17 (b)	9/15	14.89	16.23	14.61	4,296,532	
17/18 (a)	9/16	14.09	15.12	13.05	4,301,830	
17/18 (b)	9/16	17.35	17.92	11.98	4,878,739	

* Prior to 9/30/96 the minimum employer contribution required in accordance with Sec. 21.3 of the Retirement and Benefit System Ordinance was 7.60% for General and Utilities Authority, 9.61% for Police.

@ Actual Employer contributions are determined by applying the Employer's contribution rate to the emerging payroll. Projected funding requirement is derived from the City portion of the contribution rates on page B-1. The payroll was increased by a factor of 1.0816 (1.04²) to reflect projected payroll growth to the beginning of the fiscal year during which the contribution will be made. Prior to the valuation date of 9/30/05, dollar contributions included Fire members.

(a) Before changes in benefit provisions and/or actuarial assumptions and cost methods.

(b) After changes in benefit provisions and/or actuarial assumptions and cost methods.

Prior to the 9/98 actuarial valuation reimbursement of investment expenses (approx. 2% of payroll) were included in the contribution requirement. The plan was amended 4/98 to allow payment of investment expenses out of investment income.

E3. Amount for Phased-In Recognition: E1 - E2	9,117,840	4,631,494	(10,113,219)	2,578,309			
F. Phased-In Recognition of Investment Income							
F1. Current Year: 0.25 x E3	2,279,460	1,157,874	(2,528,305)	644,577			
F2. First Prior Year	3,636,260	2,279,460	1,157,874	(2,528,305)	\$ 644,577		
F3. Second Prior Year	(2,493,016)	3,636,260	2,279,460	1,157,874	(2,528,305)	\$ 644,577	
F4. Third Prior Year	<u>658,523</u>	<u>(2,493,014)</u>	<u>3,636,261</u>	<u>2,279,460</u>	<u>1,157,872</u>	<u>(2,528,304)</u>	<u>\$ 644,578</u>
F5. Total Recognized Investment Gain	4,081,227	4,580,580	4,545,290	1,553,606	(725,856)	(1,883,727)	644,578
G. Funding Value End of Year: A + D + E2 + F5	157,144,811	167,451,348	177,623,515	185,171,022			
H. Difference between Market & Funding Value	11,617,887	11,668,801	(2,989,708)	(1,965,005)			
I. Recognized Rate of Return	10.82%	10.98%	10.78%	8.89%			
J. Market Value Return	13.68%	10.24%	1.70%	9.65%			

The Funding Value of Assets recognizes assumed investment income (Line E2) fully each year. Differences between actual and assumed investment income (Line E3) are phased-in over a closed 4-year period. During periods when investment performance exceeds the assumed rate, the Funding Value of Assets will tend to be less than Market Value. During periods when investment performance is less than the assumed rate, the Funding Value of Assets will tend to be greater than Market Value. If assumed rates are exactly realized for 3 consecutive years, it will become equal to Market Value.

SECTION C

SUMMARY OF BENEFIT PROVISIONS AND
VALUATION DATA SUBMITTED BY THE
RETIREMENT AND BENEFIT SYSTEM

SUMMARY OF BENEFIT PROVISIONS (SEPTEMBER 30, 2016)

Participation: Participation in the Retirement and Benefit System begins upon employment.

Normal Retirement (no reduction factor for age):

- Eligibility** - Original members: 20 or more years of service.
- All members** - General, Utilities Authority: 25 or more years of service regardless of age, or age 60 with 5 or more years of service.
- Police: 25 or more years of service, regardless of age, or age 55 with 5 or more years of service.

Mandatory Retirement Age - None.

Annual Amount - All members: Total service times 3.0% of final average salary.

For members hired prior to October 1, 2012:

- The maximum pension benefit is \$100,000 annually.

For members hired on or after October 1, 2012:

- The maximum annual pension benefit shall not exceed 75% of final average salary.
- The maximum pension benefit is \$100,000 annually.

The normal form of benefit is a benefit payable for life. Optional forms are available on an actuarial equivalent basis.

Type of Final Average Salary - General: Highest 5 consecutive years out of last 10. Police, Utilities Authority: Highest 5 years out of last 10. Overtime hours included in compensation are limited to 300 hours per fiscal year.

For members hired prior to October 1, 2012: Payments for unused sick and vacation time included in compensation are limited to unused sick and vacation time accrued through September 20, 2012 for General and Police, and July 1, 2011 for Utilities Authority.

For members hired on or after October 1, 2012: Payments for unused sick and vacation time are not included in compensation.

Deferred Retirement Option Plan (DROP) Retirement:

Eligibility - General, Police, and Utilities Authority members: Same as Normal Retirement, election may be made on or after normal retirement eligibility, but not after reaching 30 years of service. Participation in the DROP ends after five years.

Annual Amount - Computed as a normal retirement but based upon service and final average salary at time of DROP election. Member contributions cease and monthly benefits (and post-retirement increases, if any) accumulate in a self-directed DROP account and are payable to the member upon termination of employment.

Deferred Retirement (vested benefit):

Eligibility - *For Members hired prior to October 1, 2012: 5 or more years of service.*
For Members hired on or after October 1, 2012: 10 or more years of service.
Benefit begins upon attaining age 60.

Annual Amount - Computed as a normal retirement but based upon service and final average salary at time of termination.

Duty Disability Retirement:

Eligibility - No age or service requirements if the Retirement Board finds the member to be in receipt of weekly workers' compensation on account of disability in the course of duty.

Annual Amount - Computed as a normal retirement based upon service projected to the end of the duty disability period and final average salary at time of disability. Minimum benefit is 75% of final average salary during the duty disability period. The duty disability period ends on the earlier of the 25th anniversary of the member's hire date or the date the member attains age 65 but not prior to 5 years from the date of duty disability retirement.

Non-Duty Disability Retirement:

Eligibility - 5 or more years of service.

Annual Amount - Computed as a normal retirement but based upon service and final average salary at time of disability.

Duty Death Before Retirement:

Eligibility - No age or service requirements. Benefits begin upon termination of workers' compensation.

Annual Amount - A benefit equal to the same amount that was paid by workers' compensation to the spouse until death, to unmarried children under 18 and dependent parents.

Non-Duty Death Before Retirement:

Eligibility - 5 or more years of service.

Annual Amount - Computed as a normal retirement but actuarially reduced in accordance with a 100% joint and survivor election.

Post-Retirement Increases: COLA may be granted from investment returns in excess of actuarial interest assumption, not to exceed 3%.

Military Service: May be purchased by members who meet the eligibility conditions.

Member Contributions: General: 5.16% of annual salary
 Police: 5.16% of annual salary
 Utilities Authority: 6.16% of annual salary

Employer Contributions: Actuarially determined amounts which together with member contributions are sufficient to at least cover the requirements of the funding objective stated on page A-1.

Changes in Plan Provisions: There were no changes in Plan Provisions since the last valuation.

SECTION D

ACTUARIAL COST METHOD, ACTUARIAL
ESTIMATES AND DEFINITIONS OF TECHNICAL
TERMS

ACTUARIAL COST METHOD USED FOR THE VALUATION

The actuarial cost method is a procedure for allocating the actuarial present value of future benefits and expenses to time periods. The method used for this valuation is the individual entry-age actuarial cost method, and has the following characteristics:

Actuarial Present Value of Future Benefits. Actuarial present values are calculated using the benefit provisions applicable to active members, vested terminated members, and retirees and beneficiaries as of the valuation date using the assumptions summarized elsewhere in this report.

Normal Costs. The actuarial present values for each year of service rendered before and after the valuation date are determined so that:

- (i) the annual normal costs for each individual active member, payable from the member's effective date of employment (or entry age) to projected date of retirement, are sufficient to accumulate the value of the member's benefit at the time of retirement; and
- (ii) each annual normal cost is a constant percentage of the active member's year-by-year projected pensionable pay.

Actuarial Accrued Liabilities. The actuarial present value of future benefits minus the actuarial present value of normal costs rendered after the valuation date is the Actuarial Accrued Liabilities.

Funding Value of Assets. The accrued assets recognized as of the valuation date for the purpose of determining contribution requirements.

Unfunded Actuarial Accrued Liabilities. The Actuarial Accrued Liabilities minus the funding value of assets are the Unfunded Actuarial Accrued Liabilities.

Amortization of Unfunded Actuarial Accrued Liabilities. Unfunded Actuarial Accrued Liabilities were amortized by level (principal & interest combined) percent-of-payroll contributions over periods shown elsewhere in this report. Active member payroll was assumed to increase 4.0% a year for the purpose of determining the level percent contributions, unless the 10-year average annual payroll growth is lower than 4.0%.

Actuarial Assumptions. Assumptions are established by the Board after consulting with the actuary. Non-economic assumptions are generally selected on the basis of the System's historical activity, modified for expected future differences. The reasonableness of the economic assumptions is based upon capital market expectations provided by various investment consultants and other sources such as the Social Security Trustees report. All actuarial assumptions are based on future expectations, not market measures.

Level percent-of-payroll financing of unfunded actuarial accrued liabilities treats each generation of taxpayers equally during the financing period. The alternative, level-dollar financing, produces declining percent-of-payroll contributions and places a greater relative burden on current taxpayers.

The annual rate of increase in member payroll used to compute the level percent-of-payroll contribution is the same rate of payroll growth used to compute actuarial liabilities and costs. It reflects across-the-board salary increases not group size increases.

If future payroll growth is less than the assumed rate due to smaller than projected salary increases, the percent-of-payroll contribution rate for unfunded actuarial accrued liabilities will tend to decline.

If future payroll growth is less than the assumed rate due to decreases in the number of members, the percent-of-payroll contribution rate for unfunded actuarial accrued liabilities will tend to increase but dollar contributions will be less than indicated in the preceding schedule.

Level percent-of-payroll financing of unfunded actuarial accrued liabilities treats each generation of taxpayers equally during the financing period. The alternative, level-dollar financing, produces declining percent-of-payroll contributions and places a greater relative burden on current taxpayers.

The annual rate of increase in member payroll used to compute the level percent-of-payroll contribution is the same rate of payroll growth used to compute actuarial liabilities and costs. It reflects across-the-board salary increases not group size increases.

If future payroll growth is less than the assumed rate due to smaller than projected salary increases, the percent-of-payroll contribution rate for unfunded actuarial accrued liabilities will tend to decline.

If future payroll growth is less than the assumed rate due to decreases in the number of members, the percent-of-payroll contribution rate for unfunded actuarial accrued liabilities will tend to increase but dollar contributions will be less than indicated in the preceding schedule.

ACTUARIAL ESTIMATES USED FOR THE VALUATION

Funding objective contribution requirements and actuarial present values are calculated by applying estimates of future activities (actuarial estimates) to the benefit provisions and people information of the System.

The principal areas of risk which require estimates of future activities are:

- (i) long-term rates of investment return to be generated by the assets of the System
- (ii) patterns of pay increases to members
- (iii) rates of mortality among members, retirants, and beneficiaries
- (iv) rates of withdrawal of active members
- (v) rates of disability among active members
- (vi) the age patterns of actual retirements

In a valuation, the monetary effect of each activity is calculated for as long as a present covered person survives - - - a period of time which can be as long as a century.

Actual activities of the System will not coincide exactly with estimated activities, due to the nature of the activities. Each valuation provides a complete recalculation of estimated future activities and takes into account the effect of differences between estimated and actual activities to date. The result is a continual series of adjustments (usually small) to the computed contribution rate.

From time to time one or more of the estimates are modified to reflect experience trends (but not random or temporary year-to-year fluctuations).

In accordance with Chapter 112, Florida Statutes, 112.661(9), the Retirement Board adopts the assumed rate of return assumption used for actuarial valuation purposes. The actuarial assumptions are set by the Board. The rationale for certain actuarial assumptions is described in the October 1, 1995 through September 30, 2000 experience study report. All actuarial assumptions are estimates of future experience.

Actuarial estimates regarding the net investment return, inflation, real investment return, and salary increase rates are used, in combination with the other assumptions, to (i) determine the present value of amounts expected to be paid in the future and (ii) establish rates of contribution which are expected to remain relatively level as a percent of total valuation payroll.

Net Rate of Investment Return. 7.75% per annum, compounded annually, net of investment expenses.

Inflation. 2.75% per annum, compounded annually. This is the rate at which growth in the supply of money and credit is estimated to exceed growth in the supply of goods and services. It may be thought of as the rate of depreciation of the purchasing power of the dollar. There are a number of indices for measuring the inflation rate. The recent inflation rate, as measured by the Consumer Price Index, has been:

	Year Ended September 30					Average for Period
	2016	2015	2014	2013	2012	
Actual	1.5%	0.0%	1.7%	1.2%	2.0%	1.3%
Assumed	3.0%	4.5%	4.5%	4.5%	4.5%	4.2%

Real Investment Return. 5.00% per annum, compounded annually. This is the rate of return assumed to be produced by investing a pool of assets in an inflation-free environment. Recent real investment return for the Retirement and Benefit System has been:

	Year Ended September 30					Average for Period
	2016	2015	2014	2013	2012	
Total Rate of Return	8.9%	10.8%	11.0%	10.8%	8.0%	9.9%
Less Inflation Rate	1.5%	0.0%	1.7%	1.2%	2.0%	1.3%
Actual Real Rate of Return	7.4%	10.8%	9.3%	9.6%	6.0%	8.6%
Assumed Real Rate of Return	5.0%	3.5%	3.5%	3.5%	3.5%	3.8%
Assumed Net Rate of Return	8.0%	8.0%	8.0%	8.0%	8.0%	8.0%

The total investment return rate was computed using the approximate formula $i = I$ divided by $1/2 (A + B - I)$, where I is actual realized investment income plus market value adjustments, A is the beginning of year asset value, and B is the end of year asset value.

The preceding investment return rates reflect the particular characteristics of this Retirement and Benefit System and should not be used to measure an investment advisor's performance or for comparison with other retirement systems. Such use will usually mislead.

Salary Increases. Employee salaries are estimated to increase between the date of hire and date of retirement. Salary increases occur in recognition of (i) individual merit and seniority, (ii) inflation related depreciation of the purchasing power of salaries, and (iii) competition from other employers for personnel.

A schedule of estimated rates of increases in individual salaries for sample ages follows:

Annual Rates of Salary Increases for Sample Ages						
Age	General and Utilities Authority			Police Officers		
	Merit & Seniority	Wage Inflation	Total	Merit & Seniority	Wage Inflation	Total
20	2.5 %	4.0 %	6.5 %	4.0 %	4.0 %	8.0 %
30	1.7 %	4.0 %	5.7 %	2.8 %	4.0 %	6.8 %
40	1.1 %	4.0 %	5.1 %	2.2 %	4.0 %	6.2 %
50	0.6 %	4.0 %	4.6 %	1.2 %	4.0 %	5.2 %
55	0.5 %	4.0 %	4.5 %	0.7 %	4.0 %	4.7 %
60	0.5 %	4.0 %	4.5 %	0.2 %	4.0 %	4.2 %

The merit and seniority rates for General and Utilities Authority were first used in the September 30, 2016 valuation.

The merit and seniority rates for Police Officers were first used in the September 30, 2001 valuation.

It is estimated that the group size will remain constant and that total payroll for the group will increase at the rate of the general increase in wage levels due to inflation, which in this case is 4.0%.

A schedule of recent salary change experience follows:

	% Change in Salaries					Average 5-Year
	Year Ended September 30					
	2016	2015	2014	2013	2012	
Rate of Change in Salaries						
- Total	10.1 %	3.9 %	4.5 %	4.2 %	3.2 %	5.2 %
- General	11.9	1.0	3.5	3.7	3.9	4.7
- U.A.	8.8	5.2	4.0	2.8	1.6	4.5
- Police	10.6	5.2	6.9	7.9	5.4	7.2
Expected - Total	5.0	5.8	5.9	5.8	5.8	5.7 %
- General	4.7	5.5	5.6	5.6	5.6	5.4
- U.A.	4.8	5.7	5.7	5.7	5.7	5.5
- Police	6.3	6.8	6.8	6.7	6.8	6.7

	% Change in Total Payroll						
	Year Ended September 30					Average*	
	2016	2015	2014	2013	2012	5-Year	10-Year
- Total	7.9 %	1.3 %	(0.2) %	(2.5) %	0.4 %	1.4 %	(0.1) %
- General	18.3	(6.7)	1.9	(10.0)	1.6	1.4	(1.4)
- U.A.	6.3	7.0	(4.0)	(2.3)	(0.8)	1.1	1.1
- Police	(1.3)	1.4	4.5	8.9	1.0	1.9	(0.5)

*5-year and 10-year averages include DROP payroll.

In order to achieve the funding objective of a contribution rate which remains level as a percent-of-payroll, the total rate of investment return must exceed the rate of average increase in salaries by an amount equal to the estimated real investment return rate.

Mortality Tables. The mortality tables used to measure retired life mortality were the Florida Retirement System (FRS) Mortality Tables, as described below:

- Male non-disabled retiree mortality (General & Utilities Authority): fully generational mortality. 50% of the RP-2000 Annuitant White Collar Table and 50% of the RP-2000 Annuitant Blue Collar Table, projected with scale BB. Sample values shown below.
- Male non-disabled retiree mortality (Police): fully generational mortality. 10% of the RP-2000 Annuitant White Collar Table and 90% of the RP-2000 Annuitant Blue Collar Table, projected with scale BB. Sample values shown below.
- Female non-disabled retiree mortality (All Divisions): fully generational mortality. 100% of the RP-2000 Annuitant White Collar Table, projected with scale BB. Sample values shown below.
- Male employee mortality (General & Utilities Authority): fully generational mortality. 50% of the RP-2000 Employee White Collar Table and 50% of the RP-2000 Employee Blue Collar Table, projected with scale BB.
- Male employee mortality (Police): fully generational mortality. 10% of the RP-2000 Employee White Collar Table and 90% of the RP-2000 Employee Blue Collar Table, projected with scale BB.
- Female employee mortality (All Divisions): fully generational mortality. 100% of the RP-2000 Employee White Collar Table, projected with scale BB.
- Male disabled mortality (General & Utilities Authority): 100% of the RP-2000 Disabled Male Table set back 4 years.
- Male disabled mortality (Police): 60% of the RP-2000 Disabled Male Table set back 4 years and 40% of the RP-2000 Annuitant White Collar Table.
- Female disabled mortality (General & Utilities Authority): 100% of the RP-2000 Disabled Female Table, set forward 2 years.
- Female disabled mortality (Police): 60% of the RP-2000 Disabled Female Table, set forward 2 years and 40% of the RP-2000 Annuitant White Collar Table.

Sample Ages in 2016	Single Life Retirement Values					
	Present Value of \$1 Monthly for Life			Future Life Expectancy (Years)		
	General & UA Males	Police Males	All Divisions Females	General & UA Males	Police Males	All Divisions Females
45	\$144.44	\$143.65	\$149.61	39.22	38.50	43.28
50	140.28	139.03	145.67	34.51	33.74	38.17
55	134.92	133.12	140.38	29.88	29.10	33.15
60	127.15	125.14	133.34	25.21	24.52	28.25

70	104.26	102.30	112.61	16.45	16.01	19.06
75	89.40	87.77	99.06	12.60	12.30	14.99
80	73.31	72.18	83.79	9.28	9.11	11.38

The margin for future mortality improvements is included in projection scales. 100% of deaths were assumed to be non-duty related.

Rates of separation from active membership. The rates do not apply to members eligible to retire and do not include separation on account of death or disability. This estimate measures the probabilities of members remaining in employment.

Samples Ages	Years of Service	Percent Separating Within Next Year		
		General and Utilities Authority	Police	
ALL	0	22.00 %	15.00 %	
	1	16.50	12.00	
	2	12.00	10.00	
	3	10.00	8.00	
	4	8.00	6.00	
20	5 & Over	8.00	6.00	
25		8.00	6.00	
30		8.00	6.00	
35		8.00	6.00	
40		8.00	6.00	
45		5.00	3.50	
50		2.25	1.00	
55		2.25	1.00	
60		2.25	1.00	
65		2.25	1.00	

The rates for all divisions were first used in the September 30, 2016 valuation.

Rates of Disability. These estimates represent the probabilities of active members becoming disabled.

Sample Ages	Percent Becoming Disabled Within Next Year	
	General and Utilities Authority	Police
20	0.04 %	0.07 %
25	0.04	0.09
30	0.04	0.10
35	0.05	0.14
40	0.10	0.21
45	0.17	0.32
50	0.36	0.52
55	0.59	0.92
60	0.90	1.53
65	1.00	1.65

The mortality table was set forward ten years for projecting disability costs. 100% of the disability retirements were assumed to be non-duty related for General and Utilities Authority members. 75% of the disability retirements were assumed to be non-duty for Police members.

Rates of Retirement. These rates are used to measure the probabilities of an eligible member retiring during the next year.

Service Years	Service Based		Age Based		
	General and Utilities Authority	Police	Retirement Ages	General and Utilities Authority	Police
25	40 %	75 %	55		35 %
26	40	75	56		30
27	40	75	57		30
28	40	75	58		30

			66	25	
			67	30	
			68	40	
			69	50	
			70	100	

These rates were first used for the September 30, 1995 valuation with the exception of the Police service based rates, which were first used for the September 30, 2000 valuation, Police age based rates which were first used for the September 30, 2001 valuation, and Utilities Authority service based rates which were first used for the September 30, 2007 valuation.

Marital Status. It is estimated that 80% of active members who meet the age and service requirements for pre-retirement survivor benefits are married. Female spouses are estimated to be 3 years younger than the male participant. Male spouses are estimated to be 3 years older than the female participant.

Vested members who terminate with a benefit worth less than 100% of their own accumulated contributions were presumed to elect a refund of accumulated contributions and forfeit the vested benefit.

Lump sum payments included in the calculation of the average pay upon which benefits are computed were estimated to increase benefits by the following percents.

General members	3.5 %
Utilities Authority members	3.0
Police members	4.0

Administrative Expenses. Administrative expenses for the next year are assumed to be equal to the previous year's amount.

Investment Expenses. Investment expenses are paid out of investment income.

Active Member Group Size. The valuation was based on a constant active member group size.

DEFINITIONS OF TECHNICAL TERMS

Accrued Service. Service credited under the system which was rendered before the date of the actuarial valuation.

Actuarial Accrued Liability. The difference between the actuarial present value of future benefit payments and the actuarial present value of future normal costs. Also referred to as "accrued liability" or "past service liability."

Actuarial Cost Method. A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future benefit payments" between future normal costs and actuarial accrued liability. Sometimes referred to as the "actuarial valuation cost method."

Actuarial Equivalent. A single amount or series of amounts of equal actuarial present value to another single amount or series of amounts, computed on the basis of appropriate actuarial activities.

Actuarial Present Value. The amount of funds currently required to provide a payment or series of payments in the future. It is determined by discounting future payments at predetermined rates of interest, and by probabilities of payment. Also referred to as "present value."

Amortization. Paying off an interest-discounted amount with periodic payments of interest and principal -- as opposed to paying off with lump sum payment.

Experience Estimates (Assumptions). Estimates of expected future experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement estimates (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic estimates (salary increases and investment income) consist of the underlying rates in an inflation-free environment plus a provision for a long-term average rate of inflation.

Experience Gain (Loss). The difference between actual actuarial costs and estimated actuarial costs -- during the period between two valuation dates.

Funding Value of Assets. The actuarial value of assets used to determine contribution amounts.

Normal Cost. The actuarial cost allocated to the current year by the actuarial cost method. Sometimes referred to as "current service cost."

Unfunded Actuarial Accrued Liability. The difference between the actuarial accrued liability and the actuarial value of system assets. Sometimes referred to as "unfunded past service liability," "unfunded accrued liability" or "unfunded supplemental present value."

Most retirement systems have an unfunded actuarial accrued liability. They arise each time new benefits are added and each time an experience loss is realized.

Unfunded actuarial accrued liability does not represent a debt that is payable today. What is important is the ability to control the amount of unfunded actuarial accrued liability and the trend in its amount (after due allowance for devaluation of the dollar).

SECTION E

ADDITIONAL DISCLOSURE INFORMATION

GASB Statements No. 67 and No. 68 are the accounting standards which replaced GASB Statements No. 25 and No. 27. GASB Statement No. 67 is first effective for fiscal year 2014 and GASB Statement No. 68 is first effective for fiscal year 2015. A separate GASB Statements No. 67 and No. 68 report has been issued outside of this report. This section contains historical GASB Statements No. 25 and No. 27 reporting information for prior fiscal years and illustrative information for fiscal year 2015 and after.

13/14	16.57	4,676,221	4,356,127
14/15	15.42	4,242,676	4,093,268
15/16	15.28	4,196,009	4,211,311
16/17	15.44	4,296,532	
17/18	16.41	4,878,739	

Contribution for 08/09 fiscal year and beyond excludes general fire district.

@ Actual Employer contributions are determined by applying the Employer's contribution rate to the emerging payroll. Projected funding requirement is based on a stable work force and projected salary increases.

ADDITIONAL DISCLOSURE INFORMATION

SUPPLEMENTARY INFORMATION

The information presented in the additional disclosure schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Valuation Date	September 30, 2016
Actuarial Cost Method	Individual Entry Age
Amortization Method	Level Percent-of-Payroll, Closed
Remaining Amortization Periods#	3-30 years
Asset Valuation Method	4-year smoothed market
Actuarial Assumptions:	
Investment Rate of Return*	7.75%
Projected Salary Increases**	General & U.A.: 4.0% - 6.5%
	Police: 4.0% - 8.0%
* Includes Price Inflation at	2.75%
**Includes Wage Inflation and other general increases at	4.00%
Cost-of-living adjustments	None
Retirees and beneficiaries receiving benefits	499
Terminated plan members entitled to but not yet receiving benefits	42
Active plan members	
- Vested	315
- Non-vested	<u>217</u>
Total	1,073

The periods are in compliance with Florida Statutes and Actuarial Standards of Practice, but do not necessarily produce an Annual Required Contribution with an aggregate amortization of the unfunded actuarial accrued liability under 30 years.

Ms. Johnna Morris, CGFO, CPPT, MBA
Director of Finance
City of Fort Pierce Retirement and Benefit System
100 North U.S. Highway 1
Fort Pierce, Florida 34954-1480

Dear Johnna:

Enclosed are 10 copies of the September 30, 2016 Annual Actuarial Valuation of the City of Fort Pierce Retirement and Benefit System.

As directed by the Board, we have sent a copy directly to the following:

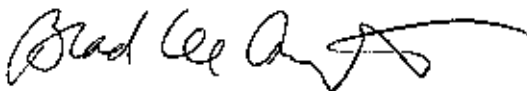

DiBartolomeo, McBee, Hartley & Barnes, P.A.

One copy should be sent, within 60 days to:

Bureau of Local Retirement Systems	Office of Municipal Police Officers'
Division of Retirement	& Firefighters' Retirement Funds
P.O. Box 9000	P.O. Box 3010
Tallahassee, Florida 32315-9000	Tallahassee, Florida 32315-3010

We welcome your questions and comments.

Sincerely yours,

Brad Lee Armstrong, ASA, FCA, EA, MAAA
