(Continued on Sheet No. 10.1)

(Continued from Sheet No. 10.0)

Minimum Charge:

The monthly minimum charge shall be the "Customer Charge" plus the "Demand Charge."

Determination of Billing Demand:

The demand to be used for billing purposes shall be the maximum fifteen (15) minute integrated demand occurring during the billing period as indicated to the nearest whole kW by a meter installed to measure demand adjusted for power factor, if applicable, but in no event shall the billing demand for any monthly bill be less than 21 kW.

High Load Factor Conservation Credit:

To any demand customer served under the GSD tariff which had a billable demand level which exceeded 40 kW, and whose load factor averaged sixty-five percent (65%) or higher during six of the previous twelve monthly billing periods. The account must be a current paying customer for the previous twelve months.

For any billing period for which a demand customer's load factor shall be 60 percent or higher, a high load factor conservation credit will be applied to the customer's bill as shown below.

Load Factor	Monthly Conservation Credit
60 to 64 percent	$ .50 per kW demand charge
65 to 69 percent	$1.00 per kW demand charge
70 to 74 percent	$1.50 per kW demand charge
75 percent & higher	$2.00 per kW demand charge

The customer's load factor (LF) for any billing period shall be determined by the following formula:

LF = ME/ (MPD*DBP*24)

The customer's utilization of equipment shall not result in a power factor at the point of delivery of less than 92% lagging at the time of maximum demand. Should the power factor be less than 92% lagging during any month, the Fort Pierce Utilities Authority may adjust the readings taken to determine the demand by multiplying the kW obtained through such readings by 92% and by dividing the result by the power factor actually established at the time of maximum demand during the current month. Such adjusted readings shall be used in determining the billing demand.

The Fort Pierce Utilities Authority reserves the right, at its option, to utilize kVA meters, RkVA meters, and/or other appropriate meters in those metering installations where the customer's power factor is believed to be unsatisfactory on a continuous basis according to Fort Pierce Utilities Authority standards. If such meters are installed, the billing demand in kW may be computed from such instruments.

Primary Service Discount:

For service provided and metered at 13.2 kV and higher where the Fort Pierce Utilities Authority has such service available in the immediate area of the load and where the customer owns, operates and maintains the necessary transformation and distribution facilities located on the load side of the primary meter, the foregoing demand charges shall be subject to a discount of thirty-five cents ($0.35) per kW of billing demand.

Tax Adjustment:

The amount computed at the above monthly rate as adjusted by the application of the monthly Power Cost Adjustment Clause shall be subject to taxes, assessments, and surcharges imposed by any governmental authority calculated in accordance with the Fort Pierce Utilities Authority's tax adjustment clause which is made a part of this rate schedule.

TERMS OF PAYMENT:

The terms of payment shall be in accordance with the provisions set forth in Fort Pierce Utilities Authority's General Rules and Regulations Governing the Provision of Utility Service.
