Cooler Homes. Hotter Savings

We, the Florida homeowner, have evolved. Not only are we becoming smarter about energy usage, we're choosing products that are better for our homes—and our planet. And while these 'little changes' go a long way, our HVAC rebates make upgrading your home—and saving money and energy every month—a *much easier change to make*.

S.A.V.E. Instantly—with HVAC!

Heating and cooling account for up to half the energy you use at home. That means an efficient cooling and heating system is about twice as important. And although purchasing new, high performance equipment can be a big investment, your cost and energy savings can be far bigger. Jump-start your return-on-investment on the following:

- High-Efficiency AC
- High-Efficiency Heat Pump
- A/C system with a minimum SEER of 14
(Seasonal Energy Efficiency Rating)

(Please visit www.FPUA.com for important rebate eligibility guidelines.)
